THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE** OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER:** Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

# **PART B - FEE(S) TRANSMITTAL**

**Complete and send this form, together with applicable fee(s), to:** Mail **Mail Stop ISSUE FEE**  
**Commissioner for Patents**  
**P.O. Box 1450**  
**Alexandria, Virginia 22313-1450**  
**or Fax** **(571)-273-2885**

**INSTRUCTIONS:** This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 657 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 657 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

## **DETAILED ACTION**

### ***Response to Amendment***

1. Applicant's amendment and remarks received 28 March 2008 have been entered and overcome the claim objections and claim rejections recited in the previous office action.

### ***Allowable Subject Matter***

2. Claims 1, 3-8, 10-15, and 31-38 are allowed.
3. The following is an examiner's statement of reasons for allowance: Regarding independent claim 1, the prior art of record neither shows or suggests an organic multicolor emission and display device comprising, in addition to other limitations of the claim, a gap material that positions the first substrate and the transparent second substrate opposite to each other in such a way that the organic light-emitting element is opposite to the color conversion layer with a predetermined clearance, wherein the gap material placed along the outer peripheral region on the inner surfaces of the first substrate and the transparent second substrate have different porosities between an inner portion of the gap material facing a sealed space and an outer portion of the gap material facing external atmosphere.
4. The closest prior art of Yamada (US 6,833,668) to independent claim 1 teaches, in Figure 7, an organic multicolor emission and display device comprising a first substrate (1'); an organic light-emitting element including at least a first electrode (23), an organic light-emitting layer (5), and a transparent second electrode (25) laminated on the first substrate; a transparent second substrate (22); a color conversion filter layer

(31) formed on the transparent second substrate, the color conversion filter layer receiving electroluminescence from the organic light-emitting layer and generating colored light; and a gap material (26) that positions the first substrate and the transparent second substrate opposite to each other in such a way that the organic light-emitting element is opposite to the color conversion layer with a predetermined clearance (32), and that seals a space between the first substrate and the transparent second substrate, wherein the gap material is placed along an outer peripheral region on an inner surface of the first substrate, the organic light-emitting element being provided on the inner surface of the first substrate and the organic light-emitting element being absent on the outer peripheral region of the first substrate; and the gap material is placed also along an outer peripheral region on an inner surface of the transparent second substrate, and the color conversion filter layer being provided on the inner surface of the transparent second substrate, and the color conversion filter layer being absent on the outer peripheral region of the transparent second substrate; and the gap material performs function to desiccate atmosphere of a sealed space between the first substrate and the transparent second substrate (col. 9, ln. 34-43).

5. However, Yamada fails exemplify the gap material placed along the outer peripheral region on the inner surfaces of the first substrate and the transparent second substrate having different porosities between an inner portion of the gap material facing a sealed space and an outer portion of the gap material facing external atmosphere. Due to their dependencies upon independent claim 1, claims 2-7 and 37 are also allowable.

6. Regarding independent claim 8, the prior art of record neither shows or suggests an organic multicolor emission and display device comprising, in addition to other limitations of the claim, a gap material that positions the first substrate and the transparent second substrate opposite to each other in such a way that the organic light-emitting element is opposite to the color conversion layer with a predetermined clearance, wherein the gap material placed along the outer peripheral region on the inner surfaces of the first substrate and the transparent second substrate have different porosities between an inner portion of the gap material facing a sealed space and an outer portion of the gap material facing external atmosphere.

7. The closest prior art of Yamada (US 6,833,668) to independent claim 1 teaches, in Figure 7, an organic multicolor emission and display device comprising a first substrate (1'); a transparent second substrate (22); a color conversion filter layer (31) formed on the transparent second substrate; an organic light-emitting element including at least a first electrode (23), an organic light-emitting layer (5), and a transparent second electrode (25), the light-emitting element being formed on the color conversion filter layer with the transparent second electrode facing the color conversion filter layer; and a gap material (26) that positions the first substrate and the second substrate opposite to each other in such a way that the organic light-emitting element is opposite to the first substrate with a predetermined clearance (3), and that seals a space between the first substrate and the second substrate, wherein the gap material is placed along an outer peripheral region on an inner surface of the second substrate, functional layers including the color conversion filter layer and the organic light-emitting element

being provided on the inner surface of the second substrate and the functional layers being absent on the outer peripheral region of the second substrate; and the gap material is placed also along a peripheral region on an inner surface of the first substrate, the peripheral region of the first substrate being opposite to the peripheral region of the inner surface of the second substrate; and the gap material performs function to desiccate atmosphere of a sealed space between the first substrate and the second substrate (col. 9, ln. 34-43).

8. However, Yamada fails exemplify the gap material placed along the outer peripheral region on the inner surfaces of the first substrate and the transparent second substrate having different porosities between an inner portion of the gap material facing a sealed space and an outer portion of the gap material facing external atmosphere. Due to their dependencies upon independent claim 8, claims 10-15, 31-36, and 38 are also allowable.

9. The subject gap material described earlier is provided for maintaining stable light emitting performance in an organic multicolor emission and display device. The design is new and unique to the art.

10. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Contact Information***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Quarterman whose telephone number is (571)272-2461. The examiner can normally be reached on M-TH (7-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Minh-Toan Ton can be reached on (571) 272-2303. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
